

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A display device including:
  - a first member including a tabletop provided with a transparent portion;
  - a second member arranged to cooperate with the first member to define an interior space for holding an article to be viewed through the transparent portion;
  - the first and second members are arranged to be selectively engaged together or disengaged by way of lockable operating means, the operating means being operable from a position outside the interior space;
  - the first and second members engage together by way of two opposed retaining means;
  - each retaining means includes a flange and a mating aperture and at least one of the flanges is movable between an engaged and a disengaged position;
  - the operating means includes a rotary lock barrel, a locking bar, and ~~which is arranged to rotate a cam;~~
  - wherein the moveable flange is disposed on the locking bar, the cam is mounted on the rotary lock barrel, and wherein rotation of the rotary lock barrel causes rotation of the cam, which in turn causes lateral movement of a the locking bar upon which one of the flanges is disposed to move the flange laterally to engage or disengage the flange with its respective aperture.

2. (Cancelled)

3. (Cancelled)
4. (Previously presented) A display device according to claim 1 wherein each flange is disposed on the second member and each recess is disposed on the first member.
5. (Original) A display device according to claim 4 wherein the flanges face outwardly from one another.
6. (Cancelled)
7. (Cancelled)
8. (Previously presented) A display device according to claim 1 wherein each flange is engageable with either recess.
9. (Currently amended) A display arrangement including:
  - a tabletop having an interior space for holding an article;
  - the tabletop includes a transparent portion allowing viewing of the article;
  - the article including an information bearing sheet and a three dimensional object;
  - the information bearing sheet includes a cut-out portion through which the object may be viewed, wherein the object is a product and the sheet bears information relating to that product;
  - and

a supporting means including a flat portion for supporting the sheet, and a depressed portion for supporting the object, wherein the supporting means is biased by compressible material ~~towards~~ against the transparent portion.

10. (Cancelled)

11. (Cancelled)

12. (Cancelled)

13. (Cancelled)

14. (Currently Amended) A display device according to claim 9 ~~11~~ wherein the supporting means is in the form of a removable tray.

15. (Previously Presented) A display device including a tabletop provided with a transparent portion;

a second member arranged to cooperate with the first member to define an interior space for holding an article to be viewed through the transparent portion; the first and second members are arranged to be selectively engaged together or disengaged by way of lockable operating means, the operating means being operable from a position outside the interior space when used in a display arrangement according to claim 9.

16. (Previously Presented) A display arrangement further comprising a tabletop having an interior space for holding an article, the tabletop includes a transparent portion allowing viewing of the articles;

the article including an information bearing sheet and a three dimensional object;

the information bearing sheet includes a cut-out portion through which the object may be viewed including a display device according to claim 1.

17. (Cancelled)

18. (Cancelled)
